1 – As defined in ETSI EN300 019-2-1 & EN300 019-2-2
2 – Availability is subject to export licence
3 – The Man-Down alarm should in no way be regarded as a substitute for compliance with appropriate risk assessment & other safety procedures & practices. To enable Man-Down a software licence is required
4 – Operating at temperature extremes may limit some aspects of operational performance
5 – Connector Protector must be enabled in customisation. An antenna, a battery & a Sepura accessory or sRAC cover must be fitted. Rinse in fresh water to prevent salt crystal build-up
6 – Bluetooth & Wi-Fi are supplied in one option module; Bluetooth supported in software from Jan'16. Wi-Fi supported in a future software release
7 – New standard (300-01174) & high-capacity (300-01175) batteries, along with the high power Class 3 feature licence, are required to operate the SC20 in high power RF Class 3 mode. Use of older STP batteries will limit SC20 operation to RF Class 3L
8 – 100% compatible with Sepura STP9000 & STP8000 RAC-based accessories
9 – STP 1+1 chargers shipped since mid-2013 are compatible
10– Existing STP belt clips may adversely affect broadband performance. SC20 belt clips are recommended
11– SDAs must be reformatted for use with an SC20
